Dear Mohammed,

David Anderson and I have just learned from Daniel Anderson that Daniel is writing up the paper on crescent domains to be authored by Daniel, Costa, Mott, and you. David and I are very surprised that our names are not to be listed as authors. As this project grew from your work with Mott, which you and David and I then spent 4 days working on intensely in a way that suggested the next step with Costa, we feel that we've been slighted, however inadvertently. This is the project about which you told us "It won't ~~hurt~~ hurt to add a couple of more names [DFA and Dobbs] to Mott and mine" after we had worked on it, and so we would not want our names on a different project instead.

Daniel will send the paper, drafted without identifying authors, for a 6-way critique. After hearing from you and me, Daniel will submit it. Do you agree to a 6-authored paper? →
